

## Unwin Seat Locker

**A premium removable seat fixture. The Unwin Seat Locker is a discreet low built lockable, engineered to be rattle free. A simple step on the actuator locks the seat into the tracking.**

Designed to be easy to use, the actuator of the Unwin Seat Locker ensures a safe and rattle free grip in one single motion and without adjustments.

Unwin's new Seat Locker takes another step forward by offering:

- Integral safety release catch to stop accidental release of the seat.
- In vehicle mobility wheel. When moving seats outside use the optional transport wheels.
- Self-locating "slot-in" mechanism.
- Single-handed operation.
- Rattle Free.
- Discreet, low-built lockable.
- Fits any rail with scallops at one inch (25.4mm) centre to centre.
- The fixing point design yields the strongest bond, yet the lockable fixture is flexible enough to fit any seat manufacture.
- Sleek and discreet profile blends in well with the interior of a modern vehicle.

*No adjustments are required when locating the Unwin Seat Locker into the rail, whether it is Innotrax, a low-profile, or surface rail. That is thanks to the improved design and the patented clamping system that ensures easy actuation of the Unwin Seat Locker in to the rail.*
